

## NewEarth engages LotusWorks to achieve Commercialization of EPT process

LotusWorks USA announced today that the company has been engaged by NewEarth Renewable Energy for the purpose of assisting NewEarth in achieving its goals in the commercialization of its Ecological Pyro-Torrefaction (EPT) technology for advanced biomass fuel production.

NewEarth Renewable Energy Inc. is a cutting edge sustainable renewable green energy company that specializes in creating renewable biomass energy fuels and sustainable energy solutions and technologies for the electric power generation industry.

NewEarth has existing and patent pending new biomass fuels and technologies that will help to meet the world's demand for sustainable renewable clean energy.

LotusWorks, working with NewEarth, will assist in the design and construction of a fleet of large industrial scale EPT commercial facilities globally & assist with training EPT factory staff to successfully run and maintain the highest degree of productivity at the EPT plant(s) into the future.

Speaking today, Steven Ostrowski, President of LotusCM stated " This is another exciting opportunity in a new renewable energy field for LotusWorks. NewEarth's E-Coal provides coal burning power plants with a true and immediate sustainable solution that will reduce Greenhouse Gas emissions. E-Oil is also sustainable and will reduce dependence on fossil oil. Together these products offer the world viable alternative energy solutions while improving our environment. We are delighted to have been selected by NewEarth to assist in achieving their objectives. This opportunity is consistent with our corporate strategy of applying our construction & technical expertise towards meeting the world's demand for clean, sustainable renewable energy"

LotusWorks immediate focus will be on achieving full operational status at NewEarth's EPT plant in the Canadian province of Quebec and will support New Earth in implementing continuous improvements to existing NewEarth Technology

### About NewEarth

NewEarth is committed to providing coal-burning power plants with a true and immediate sustainable solution to help power plants reduce their Greenhouse Gas emissions, with simple inexpensive and reliable biomass fuels that can be co-fired with coal or can replace the burning of coal altogether.

### About LotusWorks

LotusWorks is committed to helping renewable energy companies meet the world's demand for sustainable renewable clean energy & is active in the renewable & traditional energy market as a construction & technical services provider.
